Modules In Detail

RECEPTIONIST

Reception is the first point of interaction for anybody coming to the Hospital. It has all the information of the patients, doctors, departments and activities of the Hospital. All enquiries and appointments are scheduled through this module.

DOCTOR

Doctor Module has all the information of Doctors and the patient's Treatment either Indoor Or Outdoor of the Hospital.

Modules In Detail

LABORATORY

Laboratory Module generates enormous revenue for hospitals from Inpatient, Outpatient. Laboratory module automates all the processes and operations in the hospital lab right from checking the lab availability to scheduling appointment, retrieving the prescribed tests and maintaining reports. It also ensures confidentiality of the lab test reports.

PAYMENT

A Payment module is linked with hospital billing module. You get online accounting of all revenue generated along with expenses incurred. There is no need to enter the revenue entries as they are already fetched from the billing module. All relevant information for the staff salary/wages etc. is available.

Modules In Detail

CERTIFICATE

The Certificate module helps the user to see and get online print of the Certificate such as Birth and Death

STORE

This module deals with the inventory of all Hospital Equipment, Material, Consumables, Medicines, Implants & Asset items in different departments of the hospital.

REPORTS

This Module transfers all the diagnostic reports to the hospital website where the patient can view or download the report using the password. This has special significance for telemedicine.

Modules In Detail

SETTING

Setting Module involves the setting related with password and user account and also highlights the news related with Hospital.

SYSTEM CONFIGURATION

This Module will help to create the New User Account and provide the authority settings.
